

UNLIMITED FLEXIBILITY

PMLA Series D

The PMLA series of electronic multi-channel loads offer flexible solutions for demanding test applications with many test specimens.

Up to 960 channels synchronously

Up to 10 PMLA systems can be combined with each other using H&H SyncroLink.

PMLA Standard

versatile classic
for universal use

PMLA Low Power

High channel density
with up to 72 channels
per device

PMLA High Power

Power up to 2100 W

Perfect replication of complex start-up processes, all controllable via a single interface.

Maximum flexibility - each channel can be individually customized, grouped, or expanded to suit each test object.

More channels, fewer devices - enormous space savings and lower costs.

Ideal for testing control units, electronic fuses, power distributors, DC/DC converters, and much more.
